SUMMARY

Software Engineer with 2+ years of experience shipping production web applications end to end. Owned frontend architecture, ran A/B experiments that drove business growth, and delivered features across the full product lifecycle for 100,000+ monthly users.

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML, CSS, Next.js, Material UI, Figma

Backend: Node.js, Express, REST APIs, MySQL, PostgreSQL, NGINX, MongoDB, GraphQL

Tooling: AWS, Git, CI/CD, Vercel, Jest, Mocha, Chai, React Testing Library

AI: Claude, GitHub Copilot, Cursor, ChatGPT

EXPERIENCE

KiwiCo *Mountain View, CA*

Software Engineer Mar 2024 – Mar 2025

Start with this Crate

- Owned end-to-end development of a **new subscription acquisition flow**, extending the core platform to support product-specific purchases and building marketing pages that **increased subscription revenue by 20%**.
- Redesigned a one-off landing page system into a **CMS-driven platform** with dynamic routing and internal tooling, enabling marketing to launch campaigns with **zero engineering involvement** and documenting the system so other engineers could extend it across the site.

Panda 2.0

- Redesigned the baby subscription line frontend, delivering a fully age-tailored experience across product pages and components that drove a **2x increase in deluxe plan conversions** and a **25% lift in average order value**.

Site-Wide Search & Discovery

- Drove the frontend rework of site-wide search, building new interactions, states, and search results page, partnering with UX and product managers to integrate Mixpanel analytics, boosting search-to-click conversion by 15%.

Subscription Innovation

- Led a frontend architecture redesign in partnership with product and senior leadership, overhauling six core surfaces: subscription management, order confirmation, category pages, subscription product detail, and account, consolidating multiple subscription lines and streamlining navigation for **100K+ monthly active users**.

Associate Software Engineer Dec 2022 – Mar 2024

Age Range Product Pages

- Architected a **reusable, age-specific component library** for the site's highest-traffic pages, establishing shared patterns and enabling teammates to independently extend the system across age ranges.

Growth & Experimentation

- Achieved a **15% conversion increase** through rapid A/B testing using Optimizely across homepage and product pages, and led peak-traffic marketing campaign launches contributing to a **10% increase in product sales**.

Internal Tools & Platform Builds

- Built scalable internal apps and REST APIs including content and subscription management platforms; led the migration of an education platform to a dedicated subdomain with role-based features that **grew educator inquiries by 30%**.

EDUCATION

Hack Reactor — Software Engineering Program

University of California, San Diego — Bachelor's Degree

HOBBIES

Video Games (Marvel Rivals, Valorant, Super Smash Bros), Golf, Cooking, Dance, Music
