Amy Kwak

SOFTWARE ENGINEER

Seattle, WA · amykwak26@gmail.com · linkedin.com/in/amykwak · github.com/amyKwak · amy-decoded.com

SUMMARY

Full-stack engineer building e-commerce products in React and Node.js. At KiwiCo, owned subscription flows, site-wide search, and landing page infrastructure for 100K+ monthly active users, growing subscription revenue 20%. Brings a UX design background to engineering, pairing solid architecture with careful attention to the user experience.

EXPERIENCE

Software Engineer — KiwiCo

Dec 2022 – Mar 2025

Mountain View, CA

- Architected a new subscription acquisition flow end to end, extending the core platform for product-specific purchases and shipping the landing pages that grew subscription revenue by **20%**.
- Rebuilt the baby subscription line with backend engineers, shipping new brand components, 18 subscription-box pages, and an age-tailored experience that delivered a **2×** increase in deluxe-plan adoption and a **25%** lift in average order value.
- Replaced a one-off landing-page system with a CMS-driven platform featuring dynamic routing and internal tooling, letting marketing launch campaigns with **zero engineering involvement**.
- Led a frontend architecture redesign across six core surfaces (subscription management, order confirmation, category, search, product detail, and account), consolidating multiple subscription lines for **100K+** monthly active users.
- Overhauled site-wide search with new interactions and a dedicated results page, partnering with UX and product on Mixpanel instrumentation to lift search-to-click conversion by **15%**.
- Ran rapid A/B tests on the homepage and product pages with Optimizely and led peak-traffic campaign launches that grew product sales by **20%**.

Software Engineer Teaching Assistant — Galvanize

May 2022 – Aug 2022

Remote

- Mentored over 30+ students through a full-time JavaScript software engineering curriculum.
- Led office hours, lectures, and pair programming sessions, guiding students through capstone projects using full-stack technologies.

UX Designer — Lavelle & Associates

Dec 2020 – Jun 2021

San Diego, CA

- Designed and implemented design systems, establishing the firm's first cohesive brand identity across platforms.
- Improved digital visibility by **5×** through SEO audits, email campaign optimizations, and targeted Facebook/Google ads.

PROJECTS

Job Scout — Personal project

2026

- Built a TypeScript and Node.js service that polls **7** job-board REST and GraphQL APIs every **2** minutes, filters new postings, and scores fit with the Claude API using structured outputs.
- Generated a tailored, ATS-friendly resume and cover letter PDF for each match and prefilled application forms with Playwright, backed by SQLite and **50+** automated tests; built with Claude Code.

TECHNICAL SKILLS

Frontend	React, JavaScript, TypeScript, HTML, CSS, Next.js, Material UI, Figma
Backend	Node.js, Express, REST APIs, MySQL, PostgreSQL, NGINX, MongoDB, GraphQL
Tooling	AWS, Git, GitHub Actions, CI/CD, Vercel, Jest, Mocha, Chai, React Testing Library
AI	Claude, GitHub Copilot, Cursor, ChatGPT

EDUCATION

Hack Reactor — Software Engineering Program

University of California, San Diego — Bachelor's Degree
