SUMMARY

Software Engineer with 3+ years building marketing and e-commerce platforms in React, TypeScript, Node.js, and PostgreSQL for 100K+ monthly active users. Built a CMS-driven landing-page platform that let marketing launch campaigns with zero engineering involvement, and shipped SEO, A/B testing, and analytics work that grew subscription revenue 20%. Experienced with AWS, REST APIs, microservices, CI/CD, and test automation.

EXPERIENCE

Software Engineer — KiwiCo

Dec 2022 – Mar 2025

Mountain View, CA

- Replaced a brittle one-off landing-page system with a CMS-driven marketing platform with dynamic routing and internal tooling, cutting campaign time to market and letting marketing launch with **zero engineering involvement**.
- Built and deployed a new subscription acquisition flow end to end, extending core platform APIs for product-specific purchases and shipping Next.js landing pages that grew subscription revenue **20%**.
- Ran rapid A/B tests across the homepage and product pages with Optimizely and led peak-traffic marketing campaign launches that grew product sales **20%**.
- Reworked site-wide search with new interactions and a dedicated results page, adding Mixpanel instrumentation that raised search-to-click conversion **15%**.
- Rebuilt the baby subscription line frontend in React, driving a **2x** increase in deluxe-plan adoption and a **25%** lift in average order value.
- Led a frontend architecture redesign across six core e-commerce surfaces, building reusable, high-quality component systems that unified multiple subscription lines for **100K+** monthly active users.

Software Engineer Teaching Assistant — Galvanize

May 2022 – Aug 2022

Remote

- Mentored 30+ students through a full-time JavaScript software engineering curriculum, guiding them from first principles to shipped projects.
- Led office hours, lectures, and pair programming sessions, supporting capstone projects built on full-stack technologies and relational databases.

UX Designer — Lavelle & Associates

Dec 2020 – Jun 2021

San Diego, CA

- Designed and implemented the firm's first design system in Figma, establishing typography, color, and component standards across platforms.
- Designed core pages and inquiry flows, improving digital visibility **5x** through SEO audits, email campaign optimization, and targeted ads.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML, CSS, SQL
Frontend	React, Next.js, Material UI, Figma
Backend	Node.js, Express, REST APIs, microservices, GraphQL, PostgreSQL, MySQL, MongoDB, NGINX
Cloud & DevOps	AWS, CI/CD pipelines, GitHub Actions, Git, Vercel
Testing	Jest, Mocha, Chai, React Testing Library, automation testing, A/B testing (Optimizely)
AI	Claude, Claude Code, GitHub Copilot, Cursor, ChatGPT

EDUCATION

Hack Reactor — Software Engineering Program

University of California, San Diego — Bachelor's Degree

INTERESTS

Video games, golf, music, cooking, dance
